

For heavy-duty industrial cleaning and hazardous dust collection

At the same time, it can be fitted with H-Class filtering for use where the dust may be potentially hazardous. But the real edge over the competition can be seen in the practical 'sit-down' system for emptying the container, and in the special design features that make the work just that much easier. A range of 38 mm and 50 mm accessories are available and makes it possible to handle all kind of jobs.

- Two motor industrial performance
- XtremeClean fully automatic filter cleaning system for high efficiency also in H class
- Big surface filter for high efficiency and low maintenance costs
- Stainless steel sit down container for easy handling and disposal
- 10 meter cable for a large working radius
- Disposal bag standard
- Socket for automatic on/off (only -2H/M model)

The tougher the cleaning, the better the vacuum cleaner needs to be. This is why so much thought has gone into the design of the IVB 965-21 SD. With 7200 ltr. per minute of air flow, and 3000 W of maximum power, it is capable of fast, productive cleaning of dirt, metal chips and liquid spills.
